SUMMARY

Generative AI and Machine Learning Engineer with strong fundamentals in **Transformers, LLMs, embeddings, and RAG**. Hands-on experience building **intelligent AI agents with tools and memory**, multimodal GenAI applications, and end-to-end ML pipelines. Proficient in HuggingFace, LangChain, vector databases, and real-world AI system design. Actively seeking **GenAI/AI Engineer internship and entry-level roles**.

TECHNICAL SKILLS

Programming: Python, C++, SQL
Machine Learning: Supervised & Unsupervised Learning, Feature Engineering, Model Evaluation, End-to-End ML Pipelines
NLP & GenAI: Transformers, LLMs, Prompt Engineering, Embeddings, RAG, Multimodal GenAI, AI Agents (Tools, Memory, Planning), LangChain, LlamaIndex, MCP (fundamentals)
Libraries & Tools: Pandas, NumPy, scikit-learn, Matplotlib, TensorFlow, Keras, HuggingFace, Git, GitHub, Jupyter Notebook

EXPERIENCE

Junior Data Scientist – Job Simulation <i>BCG X</i>	Jan 2026 – Present <i>Remote</i>
– Performed exploratory data analysis (EDA) on customer and pricing datasets to identify churn patterns – Engineered features and trained machine learning models achieving strong predictive performance – Evaluated models using appropriate metrics and visualizations – Explored LLM-based analytical workflows for business-oriented decision support	
Data Science Intern <i>National Institute of Technology, Patna</i>	Jun 2025 – Jul 2025 <i>India</i>
– Worked on data preprocessing, exploratory analysis, and machine learning model development – Collaborated with team members to deliver data-driven insights and technical reports	

PROJECTS

Intelligent AI Agent (Tools + Memory): Designed AI agent with reasoning, planning, and decision-making capabilities; integrated short-term and long-term memory for contextual interactions; enabled tool-calling for search, calculation, and data retrieval
RAG-Based Knowledge Assistant: Built Retrieval-Augmented Generation system using embeddings and vector database; implemented document chunking, semantic search, and LLM integration to reduce hallucinations; orchestrated pipeline using LangChain/LlamaIndex
Multimodal GenAI Application: Developed multimodal GenAI application combining text and image understanding using transformer-based models; enabled user interaction through visual and textual inputs
End-to-End Machine Learning Project: Built complete ML pipeline from data preprocessing to model evaluation; performed feature engineering, model selection, and performance optimization
MCP/AI Infrastructure Project: Explored Model Context Protocol (MCP) for standardized interaction between LLMs and tools; designed MCP-compatible tool interfaces for scalable AI system design

EDUCATION

Sikkim Manipal Institute of Technology <i>B.Tech in Computer Science Engineering (IoT & Cyber Security)</i>	2023 – 2027 <i>India</i>
---	-----------------------------

CERTIFICATIONS & AWARDS

Certified Generative AI Professional BCG Data Science Job Simulation Oracle Cloud Infrastructure 2025 CCNA Gold Medalist – PromptVerse College Fest
